

# IMOM | International Quantitative Momentum ETF

**Why consider IMOM?** | IMOM target stocks with the strongest relative momentum over the past year. The portfolio is **equal-weighted and rebalanced frequently** to maintain consistent exposure to what we believe to be the strongest international momentum stocks on the expectation that stocks with these characteristics will outperform over time.

	Int'l Momentum ETFs <sup>1</sup>	IMOM	Potential Advantage
Avg. # of holdings	169.8	50.0	FOCUSED
Turnover Ratio <sup>2</sup>	116.3%	219.0%	ACTIVE
Foreign Large Blend Overlap <sup>3</sup>	24.0%	9.4%	UNIQUE
Momentum Score (weighted avg.) <sup>4</sup>	52.67%	102.32%	MOMENTUM

Source: FactSet, YCharts, Alpha Architect. Data as of 7/7/2025 for 6/30/2025

**IMOM Top 10 Holdings by Momentum Score** | IMOM's equal-weighted strategy tends to **invest at a higher weighting than a market-cap weighted strategy**; rebalancing frequently may increase the probability that we own a portfolio of high momentum stocks that continue to experience price appreciation.

Ticker	Name	Sector	Momentum Score	Mkt. Cap. (\$ bil)	IMOM Weighting	Fgn. Lg. Blend Index <sup>5</sup> Weighting

Source: FactSet, YCharts, Alpha Architect. Holdings as of 7/7/2025 for 6/30/2025. **Investing involves risk, including the loss of principal. Past performance does not guarantee future results.** <sup>1</sup>**Int'l Momentum ETFs** represented by ETFs that we believe use a momentum-based strategy to manage its portfolio. Momentum defined as buying securities that have had high returns over a recent period and selling those that have had poor returns over the same period. Funds selected based on the appearance of "momentum" in the security's name and a portfolio that predominantly invests in developed international securities. [See note on category average methodology.](#) <sup>2</sup>**Turnover ratio** measures the frequency at which assets in a portfolio are bought and sold over a specific period. <sup>3</sup>**Foreign Large Blend** represented by active share, which measures the percentage of a portfolio's holdings that differ from its benchmark index. Calculated relative to the MSCI EAFE Index (represented by the iShares MSCI EAFE ETF). <sup>4</sup>**Momentum Score** is a system that scores companies based on their one-year total returns, excluding the last month of returns. Momentum is a characteristic of the security's underlying holdings and should not be construed as performance. <sup>5</sup>**Foreign Large Blend** represented MSCI EAFE Index (represented by the iShares MSCI EAFE ETF). You cannot invest directly in an index or category average.

## Rolling 1-Year Excess Returns<sup>6</sup> | IMOM & Int'l Momentum ETFs relative to Foreign Lg. Blend Cat. Avg.

Source: FactSet, Alpha Architect, YCharts. Monthly returns at NAV. 1/1/2016 – 6/30/2025. **Investing involves risk, including the loss of principal. Past performance does not guarantee future results. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call (215) 882-9983 or visit [www.alphaarchitect.com/funds](http://www.alphaarchitect.com/funds). The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The statutory and summary prospectus contains this and other important information about the investment company, and it may be obtained once available by calling 215-882-9983 or visiting [www.AlphaArchitect.com/Funds](http://www.AlphaArchitect.com/Funds). Read it carefully before investing.** Returns are annualized total returns, except for those periods of less than one year, which are cumulative. Returns and characteristics are believed to be accurate but are not guaranteed. **Market price returns (MKT)** are based upon the closing composite market price and do not represent the returns you would receive if you traded shares at other times. A fund's NAV is the sum of all assets less any liabilities, divided by the number of shares outstanding. <sup>6</sup>**Rolling excess returns** measure the difference in performance between an investment and a benchmark over successive, overlapping periods. **Gross expense ratio** measures the total annual operating expenses of a mutual fund or an exchange-traded fund (ETF) expressed as a percentage of the fund's average net assets. **Net expense ratio** represents the cost of owning a fund. It expresses the percent of assets deducted each fiscal year to cover various fund expenses, including 12b-1 fees, management and administrative charges, operational expenditures, and all other costs tied to managing and operating a fund, less any fee waivers or other rebates.

**IMPORTANT RISK INFORMATION:** Investors should carefully consider the investment objectives, risk, charges, and expenses of the funds. This and other important information is in the indicated fund's prospectus, which can be obtained by calling (215) 882-9983 or by visiting [www.AlphaArchitect.com/funds](http://www.AlphaArchitect.com/funds). The prospectus should be read carefully before investing.

**Category Average Methodology.** As of 4/30/2024, the calculation method used to determine the category average's returns changed to account for potentially different inception dates. Previously, a straight average of constituent funds' total return net asset value (NAV) was used to determine the category's average total return NAV; the percent change of the category average NAV was then used to calculate returns. As of 4/30/2024, total returns for the category are now found using a straight average of the total NAV return (percent change) for a given frequency (daily, weekly, monthly, etc.). There may be instances where the straight average of the constituent funds' NAV returns may be higher or lower than the straight average of the total NAV return. As of 4/30/2024, all category average returns are calculated using the straight average of the constituent funds' total NAV return for a given frequency.

## Note on momentum category

There is no explicit "momentum" category. Generally, momentum funds tend to fall into the "growth" category, however, that standard is not uniformly applied by third party data providers such as FactSet, Morningstar, YCharts, or others. To facilitate what we believe to be fair and balanced comparison, we build a momentum category using the following criteria.

## International Developed Momentum

1. Exclude Alpha Architect funds
2. Exclude non-USD denominated funds
3. Exclude mutual funds. We do this to facilitate a fair comparison at a structural level (ETF to ETF) and to facilitate accurate advanced characteristics data, such as active share and momentum score
4. Filter for Broad Asset Class: International Equity & Sector Equity. We include sector momentum ETFs on the basis that a sector-based momentum strategy could be a reasonable alternative to a broad-based momentum approach. Filtering for funds in the International Equity broad asset class excludes alternatives such as long/short momentum funds. Our goal is to identify "peer" momentum strategies that are long-only.
5. Filter for US Equity Exposure <50%. We seek to avoid strategies that aren't focused on International Developed equities.
6. Filter for Emerging Market exposure <20%. Our Quantitative Int'l Momentum ETF (IMOM) excludes emerging market equities in its process; as a result, we remove funds focused on emerging market to facilitate what we believe to be a fair and balanced comparison.
7. Remove funds that contain the word "value" or variations in the fund's name. This removes funds that blend value and momentum together, which can cause performance deviations.
8. Filter funds that contain the word "momentum" or variations in the fund. While this step likely understates the number of funds that use momentum in their investment strategy, we believe this is a reasonable approach to identify funds seeking to hold themselves out as a momentum strategy.

**Limited universe.** These steps may generate a limited universe of funds that meet the stated criteria. The information presented regarding peer ETFs is based on a limited universe of comparable funds that we believe are relevant to the strategy, investment style, and asset class of this ETF. This comparison is not exhaustive and may exclude other funds that also offer similar exposures or strategies. Investors are encouraged to conduct their own research and consider other products in the marketplace that may provide comparable investment objectives or characteristics. Past performance is no guarantee of future results, and differences in fees, structures, or market conditions may lead to different outcomes between peer funds and this ETF. Investors should consider factors such as risk tolerance, fees, liquidity, and investment goals before making any investment decisions based on peer comparisons. This disclosure is not an endorsement of any peer fund, nor should it be interpreted as financial advice. As of 7/7/2025, there are three funds that meet the given criteria.

---

**Investment Risk.** When you sell your Shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.

**Management Risk.** The Fund is actively managed and may not meet its investment objective based on the Adviser's success or failure to implement investment strategies for the Fund.

**Momentum investing** is investing in or having exposure to securities with positive momentum entails investing in securities that have had above-average recent returns. These securities may be more volatile than a broad cross-section of securities. Returns on securities that have previously exhibited momentum may be less than returns on other styles of investing or the overall stock market. Momentum can turn quickly and cause significant variation from other types of investments, and stocks that previously exhibited high momentum may not experience continued positive momentum. In addition, there may be periods when the momentum style is out of favor, and during which the investment performance of the Fund using a momentum strategy may suffer.

**Quantitative Security Selection Risk.** Data for some companies may be less available and/or less current than data for companies in other markets. The Adviser uses a quantitative model, and its processes could be adversely affected if erroneous or outdated data is utilized. In addition, securities selected using the quantitative model could perform differently from the financial markets as a whole as a result of the characteristics used in the analysis, the weight placed on each characteristic and changes in the characteristic's historical trends.

**Equity Investing Risk.** An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Investment Risk. When you sell your Shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.

**Large-Capitalization Companies Risk.** Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years. Larger, more established companies may be slow to respond to challenges and may grow more slowly than smaller companies.

**Small- and Mid-Capitalization Company Risk.** Investing in securities of small- and mid-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies. Often small- and mid-capitalization companies and the industries in which they focus are still evolving and, as a result, they may be more sensitive to changing market conditions.

The Fund is distributed by PINE Distributors LLC. The Fund's investment adviser is Empowered Funds, LLC, which is doing business as ETF Architect. Alpha Architect, LLC serves as the Sub-adviser to the Fund. PINE Distributors LLC is not affiliated with ETF Architect or Alpha Architect, LLC.
